Join Teton Behavior Therapy this summer and embark on a journey of discovering what it takes to create goals, solve problems, develop and utilize organizational skills, and tackle problematic procrastination. We believe that a summer camp atmosphere will help campers learn new ways of getting things done and feeling more successful too.

Executive Functioning is the set of mental skills that help us plan, focus attention, remember instructions and figure out how to complete multiple tasks. Some children struggle more than others with these skills, especially children with ADHD, Dyslexia or other different or unique learning styles.

From planning day hikes in Grand Teton National Park, meal planning and cooking with a professional chef, to overcoming obstacles in high-up ropes courses, TBT's EF Adventure Camp will help you become a true Executive Functioning champion.
